

Biological Sciences

The Biological Sciences curriculum provides the foundation for our three majors: Biological Sciences, Biotechnology and Natural History. Our two-year Associate in Arts Degrees are designed to provide the knowledge and skills for success before and after transfer to a four-year institution. Students who complete specialized one-year programs of study in Bio-Medical Sciences, Marine Science and Natural History can earn Biological Sciences Departmental Awards.

Our Biological Sciences and Biotechnology Associate in Arts Degrees provide preparation for transfer in such areas as Biochemistry, Molecular Biology, Pharmacology, Cell Biology, Ecology, Marine Biology, Botany, Zoology, Medical Technology and Pre-Medicine.

The Bio-Medical Sciences Associate in Arts Degree (pending) is designed to provide a strong foundation for students interested in pursuing a career in the health sciences.

The Natural History Associate in Arts Degree provides preparation for transfer in such areas as Natural History, Freshwater and Marine Fisheries, Environmental Studies and Wildlife Management. The Natural History A.A. can be completed fully online.

We offer specialized and general courses for all students, and support courses for medical technology and health services; recreation and nature interpretation; environmental studies; marine diving technology; and sports medicine. Many courses of a more general nature allow students to fulfill General Education and graduation requirements in Natural Sciences, while developing a biological perspective.

Our courses take advantage of the newest technology for delivery of information to students, while retaining the tradition of personalized instruction and small class sizes. Computers at every lab bench, a 30-station computer classroom and a seamless network allow student access to computer tools and information from any Biological Sciences classroom, laboratory and tutor room.

Online instruction carries this concept off campus to our students in Santa Barbara and worldwide, through more than 11 fully online classes. The excitement of beginning a path to a meaningful profession in biology is enhanced by a completely integrated system for acquiring information from instructors who love biology and teaching.

Advances in biological knowledge are providing solutions to the most challenging problems in medicine, environmental resources, agriculture and human ecology. Employment opportunities continue to increase as knowledge grows in genetic engineering, embryonic development, learning and memory, aging, natural resource management and the regulation of populations.

Department Offices

Degrees Awarded

Biological Sciences: Associate in Arts

Liberal Arts: Emphasis in Bio-Medical Sciences:
Associate in Arts (pending Chancellor's Office approval)

Biotechnology: Associate in Arts (pending Chancellor's Office approval)

Natural History: Associate in Arts

Departmental Awards

Bio-Medical Sciences: Departmental Award
Marine Science: Departmental Award
Natural History: Departmental Award

Honors Certificate of Achievement: Sciences

See "Honors Program" in the *Catalog* Index.

Planning a Program of Study for Transfer

Special problems confront the student planning to transfer to a four-year college or university. Both General Education and major requirements differ from one institution to another and within a single institution by major emphasis. These differences, plus personal, educational and professional goals, employment and prior preparation, will influence the courses you take. *You should work closely with the Biological Sciences Faculty Adviser, Robert Cummings (EBS-324, ext. 2515), to plan your program of study at SBCC.*

General Education. It is *very important* for biology majors to complete the preparation in the major even if it means delaying some General Education/IGETC requirements. The science curriculum is sequential, controlled by prerequisites; you do not want to be in the position of taking freshman science classes as a junior.

Preparation in the Major. Since biology courses are built upon a base of mathematics and the physical sciences, it is important for biology students to begin these courses early so that they may be completed before transfer. The areas of highest concern are Mathematics, Chemistry, Physics and preparation in Biology. Students who must make up deficiencies should do so as early as possible.

Mathematics. Statistics is more widely applicable in biology than is calculus, yet most institutions require calculus because of its utility in rate-oriented biology. You should attempt to complete Elementary Statistics (MATH 117) and a calculus sequence (MATH 130-131 or 150-160) prior to transfer. If you are not eligible for these courses based on your placement exam scores, immediately enter the mathematics sequence at the recommended course level.

Chemistry. It is difficult to understand modern biology without at least an introduction to organic chemistry. Students without prior chemistry background and/or mathematics deficiencies may need to take CHEM 101 and appropriate mathematics

courses before beginning the General and Organic Chemistry sequence (CHEM 155, 156, 211-221, 212-222). Note, however, that some universities require upper division organic chemistry. If so, complete organic chemistry after transfer.

Physics. There are three physics sequences for biology majors. General Physics (PHYS 105-106) requires algebra and trigonometry. PHYS 110-111 and PHYS 121-122-123 require calculus. Again, colleges and universities differ as to their physics requirements. Many require calculus-based physics.

Biology. SBCC has one of the strongest programs for preparation in four biology majors: Biological Sciences, Bio-Medical Sciences, Biotechnology and Natural History. In addition to the biology major core sequence, BIOL 101-Plant, 102-Animal, 103-Cell, 104-Molecular and 105-Molecular Laboratory, biology students may choose from a wide range of courses to add depth and diversity to match their goals and interests. Four-year colleges and universities have different core sequences; to assure compatibility of your course selection and transfer institutions, contact the Counseling Center (Student Services, Room 120).

Declaring a Biology Major

If you have decided to major in biology, or you are not sure but are strongly considering it, *declare a biology major*. Declaring your major protects you from changes of departmental requirements. You will be able to follow either the rules in effect at the time you declared your major, or the rules as later changed. Further, by declaring a biology major you meet one of the requirements for scholarships offered by the Biological Sciences Department.

You may declare a biology major at the time you register at SBCC. Any time thereafter, you may declare a biology major or change your major by filing a "Change of Major" form at the Office of Admissions and Records.

Associate in Arts Degree

In order to achieve an Associate in Arts Degree, a student must complete a minimum of sixty (60) units of work, which must fulfill General Education, SBCC and department requirements. For complete information on General Education and SBCC requirements, see "General Education" and "Graduation and Transfer Requirements" in the *Catalog* Index.

**Associate in Arts Degree:
Biological Sciences**

The Biological Sciences major is designed to provide a strong foundation for students interested in life's structures and functions from perspectives of molecules and cells, organisms and populations, and ecology and evolution.

Department Requirements (29.5 units)

BIOL 101 — Plant Biology	5
BIOL 102 — Animal Biology	5
BIOL 103 — Cell Biology	5.5
BIOL 104 — Molecular Biology*	4
CHEM 155 — General Chemistry	5
CHEM 156 — General Chemistry	5

*BIOL 105, Molecular Biology Laboratory, strongly recommended.

Recommended for Transfer

These additional courses should be considered when planning a program of study for transfer as a biology major.

- BIOL 105 — Molecular Biology Laboratory
- CHEM 211-221 — Organic Chemistry I & Lab
- CHEM 212-222 — Organic Chemistry II & Lab
- MATH 117 — Elementary Statistics **or**
- MATH 117H — Elementary Statistics, Honors
- MATH 130-131 — Calculus for Biological Sciences, Social Sciences & Business I & II **or**
- MATH 150-160 — Calculus with Analytic Geometry I & II
- PHYS 105-106 — General Physics **or**
- PHYS 110-111 — Introductory Physics **or**
- PHYS 121-122-123 — Calculus-Based Physics

Biological Sciences Sample Program

The following sample program will satisfy department and college requirements for graduation with an A.A. Degree and includes additional recommended courses to meet department requirements of most four-year colleges and universities.

First Year

<i>Fall Semester</i>	<i>Spring Semester</i>
Biology 101	Biology 102
Chemistry 155	Chemistry 156
Mathematics 130 or 150*	Mathematics 131 or 160*
English 110 or 110H	English 111 or 111H
Physical Education	

Second Year

<i>Fall Semester</i>	<i>Spring Semester</i>
Biology 103	Biology 104
Chemistry 211-221*	Biology 105*
Physics 110*	Chemistry 212-222*
Geography 102	Physics 111*
Physical Education	Poli. Science 101

*Recommended for students planning to transfer.

**Associate in Arts Degree:
Liberal Arts: Emphasis in Bio-Medical
Sciences** (pending Chancellor's Office approval)

Department Requirements (30-31 units)

BMS 107 — Human Anatomy.....	4
BMS 108 — Human Physiology	4
BMS 127 — Medical Microbiology.....	5
CHEM 101 — Introductory Chemistry or	
CHEM 104 — Fund of General, Organic & Biol Chem or	
CHEM 155 — General Chemistry I	4-5

In addition, 13 units of elective credit should be selected in consultation with the Bio-Medical Sciences Faculty Adviser, Joseph Connell (EBS-307, ext. 5172).

Associate in Arts Degree: Biotechnology

(pending Chancellor's Office approval)

The Biotechnology A.A. Degree will prepare you for transfer in such areas as Biochemistry, Chemistry, Organic Chemistry, Molecular Biology, Cell Biology, Pharmacology, Food Science, Forensic Criminology, Medical Technology and Environmental Biology. Courses in this major provide the opportunity to develop skills for research and employment in biotechnology.

Department Requirements (37.3 units)

BIOL 103 — Cell Biology	5.5
BIOL 104 & 105 — Molecular Biology & Lab	6
BIOL 106 — Biology of Research Organisms	5
CHEM 155 & 156 — General Chemistry I & II	10
CHEM 211, 212, 221 & 222 — Organic Chemistry I & II & Labs	10.8

Recommended for Transfer

These additional courses should be considered when planning a program of study for transfer as a Biotechnology major.

MATH 117 or 117H — Elementary Statistics
MATH 150-160 — Calculus with Analytic Geometry I & II or
MATH 130-131 — Calculus for Biological Sciences, Social Sciences & Business I & II
PHYS 105-106 — General Physics or
PHYS 110-111 — Introductory Physics or
PHYS 121-122-123 — Calculus-Based Physics

Biotechnology Sample Program

The following sample program will satisfy department and college requirements for graduation with an A.A. Degree and includes additional recommended courses to meet department requirements of most four-year colleges and universities.

First Year

<i>Fall Semester</i>	<i>Spring Semester</i>
Math 117 or 117H*	Biology 103
Chemistry 155	Chemistry 156
Mathematics 130 or 150*	Mathematics 131 or 160*
English 110 or 110H/120	English 111 or 111H
Physical Education	

Second Year

<i>Fall Semester</i>	<i>Spring Semester</i>
Biology 106	Biology 104-105
Chemistry 211-221	Chemistry 212-222
Physics 110*	Physics 111*
Geography 102	Poli. Science 101
Physical Education	

*Recommended for students planning to transfer.

**Associate in Arts Degree:
Natural History**

The Natural History major is designed to provide a broad survey of the diversity of Earth's life forms and their evolutionary and environmental relationships. By carefully choosing electives, a student may emphasize specialized areas for transfer, including aquatic biology, zoology, botany and environmental biology.

Department Requirements (29-30 units)

BIOL 110 — Natural Science or	
BIOL 110H — Natural Science, Honors or	
BIOL 120 — Natural History or	
BIOL 140 — Principles of Biology	3 – 4
BIOL 112 — Evolution and Adaptation or	
BIOL 150 — Biodiversity	3
BIOL 122 — Ecology	3
BIOL 123 — Ecology Laboratory	1
BIOL 144 — Biogeography or	
EARTH 141/GEOG 101 — Physical Geography	3
BOT 121 — Plant Diversity ¹	4
ZOOL 122 — Animal Diversity ^{2,3}	3
Natural History electives	9

¹ Biology 101 — Plant Biology (5) may substitute for Botany 121

² Biology 102 — Animal Biology (5) may substitute for Zoology 122 + 123

³ Zoology 123 — Animal Diversity Lab recommended

In addition, 9 units of elective credit, selected in consultation with the Natural History Faculty Adviser, are required to complete the major field requirements.

Selection of Natural History Electives

Students may choose Natural History elective courses from the areas of Anthropology, Art, Biology, Bio-Medical Sciences, Botany, Chemistry, Earth and Planetary Sciences (Geology), Environmental Studies, Mathematics, Physics and Zoology.

Students intending to transfer with an A.A. Degree in Natural History should include introductory courses in general and organic chemistry, physics and statistics. *Natural History electives must be selected in consultation with the Natural History Adviser and should be made carefully to avoid problems with departmental approval and transfer.*

Natural History Sample Transfer Program

The following sample program illustrates a course sequence that emphasizes general Natural History. This program will satisfy department and college requirements for graduation with an A.A. Degree and includes elective courses to meet departmental requirements of many four-year colleges and universities.

First Year

Fall Semester

Biology 122¹ + 123¹
 Biology 144¹
 Chemistry 155²
 English 11 0¹

Spring Semester

Biology 120¹
 Zoology 122¹ + 123²
 Chemistry 156²
 English 111¹

Second Year

Fall Semester

Biology 112¹
 Biology 140¹ + 141²
 Mathematics 117¹
 Political Science 101¹

Spring Semester

Biology 142^{1,2}
 Botany 121¹
 Zoology 137^{1,2}
 Art 215¹
 Communication 121¹

¹ Available online

² Natural History Electives must be selected in consultation with the Natural History Faculty Adviser.

Departmental Awards

Students who have successfully completed a defined program of study in the areas of bio-medical sciences, marine science and natural history earn Biological Sciences Departmental Awards. Each program of study can be completed in one year. There are neither college requirements nor General Education requirements that need be taken.

Complete descriptions of Departmental Awards requirements are available from the Biological Sciences Department office.

Bio-Medical Sciences

Department Requirements: 31 units

The Bio-Medical Sciences Departmental Award recognizes achievement by students interested in careers in the allied health fields, physical/health education, recreation and sports technology. Core courses consist of BMS 107 (Human Anatomy), BMS

108 (Human Physiology) and BMS 127 (Medical Microbiology). In addition to the core curriculum, students must select 18 units of electives from an approved listing of courses in biology, anthropology, art, chemistry, physical/health education, recreation and human biology.

A student must complete each of the courses in the Approved Program of Study with a grade of "C" or better.

Natural History

Department Requirements (29-30 units)

BIOL 110 — Natural Science <i>or</i>	
BIOL 110H — Natural Science, Honors <i>or</i>	
BIOL 120 — Natural History <i>or</i>	
BIOL 140 — Principles of Biology	3 – 4
BIOL 112 — Evolution and Adaptation <i>or</i>	
BIOL 150 — Biodiversity	3
BIOL 122 — Ecology	3
BIOL 123 — Ecology Laboratory	1
BIOL 144 — Biogeography <i>or</i>	
EARTH 141/GEOG 101 — Physical Geography	3
BOT 121 — Plant Diversity ¹	4
ZOOL 122 — Animal Diversity ^{2,3}	3
Natural History Electives	9

¹ Biology 101 — Plant Biology (5) may substitute for Botany 121

² Biology 102 — Animal Biology (5) may substitute for Zoology 122 + 123

³ Zoology 123 — Animal Diversity Lab recommended

In addition, 9 units of elective credit, selected in consultation with the Natural History Faculty Adviser, are required to complete the major field requirements.

A student must complete each of the courses required with a grade of "C" or better.

Marine Science

The Marine Science Departmental Award comprises 21 units and signifies that students have a broad background in the physical and biological processes of the world's oceans and the tools and techniques with which they are studied. The curriculum includes courses from Biology, Marine Technology and Earth and Planetary Sciences, and is especially suited to students interested in the fields of mariculture,

boating and recreation, skin and Scuba diving, fishing, scientific research and marine science.

Students interested in a Marine Biology major should take the Biological Sciences majors sequence. You are encouraged to supplement this sequence with courses in Marine Science.

Marine Science Required Courses (21 units)

Students planning on completing the Marine Science curriculum in two semesters can begin in either Fall or Spring.

Fall Semester

BIOL 124* — Biological Oceanography	4
ERTH 152 — Introductory Meteorology	3
MDT 108 — Rigging	1.6
MDT 109 — Seamanship	2.1
HE 103* — Responding to Medical Emergencies	2

Spring Semester

BIOL 125* — Marine Biology.....	4
MDT 101 — Information and Introduction to Marine Diving Technology	0.3
ERTH 151/151L — Introductory Physical Oceanography & Lab.....	4

Plus completion of Basic Scuba Diving Certificate

**Substitutions:* The combination of BIOL 101 (Plant Biology) and BIOL 102 (Animal Biology) can be substituted for BIOL 125. The completion of AH 110 can be substituted for HE 103. The completion of BIOL 142 can be substituted for BIOL 124.

A student must complete each of the required courses (or use substitution options) with a grade of “C” or better.

Advising

Students pursuing Departmental Awards are encouraged to identify themselves to the appropriate adviser to formulate a program of study and ensure space in classes.

Bio-Medical Sciences: Michel T. Masson

Environmental Studies: Adam Green

Marine Science: Genevieve Anderson

Natural History: Larry Jon Friesen

Honors & Awards

Outstanding Student Awards

Each year one student may be selected “Outstanding Student” in Biology, Bio-Medical Sciences, Botany, Cell, Molecular, Natural History, Marine Science and Zoology. Selections are made by the Biological Sciences Department faculty. Selections are based solely on academic excellence and applications by students are not required.

Robert J. Profant Memorial Scholarship

Established in 1991 in honor of the late Professor Profant’s long and dedicated career, and awarded once each year, the Robert J. Profant Scholarship recognizes an outstanding student majoring in biology. Students are recommended to the department by faculty or may apply through the Financial Aid Office.

To qualify for a scholarship award, a student must be a declared biology major (Biological Sciences, Biotechnology or Natural History), enrolled in a course offered by the Biological Sciences Department during the academic year of application, and have a 3.5 G.P.A. in courses from the sciences and mathematics.

William Olivarius Scholarships

In 1982, a generous endowment from the late William Olivarius enabled the Biological Sciences Department to offer scholarships to students majoring in biology. Several scholarships of \$500 are awarded each year on the basis of academic excellence.

To qualify for a scholarship award, a student must be a declared biology major (Biological Sciences, Biotechnology or Natural History), be enrolled in a minimum of 12 units each semester of the award year, and have a minimum overall grade point average of 3.0. All students with exceptional overall G.P.A.s are encouraged to apply.

Scholarship applications are available from the Biological Sciences Department Office. Applications and faculty nominations are due the first Friday of March.

Richard Armstrong Memorial Scholarship

Richard Armstrong is warmly remembered as a dedicated scientist and SBCC professor who taught in the Biological Sciences Department for three decades. He passed away in the Spring 2005 semester and is honored by his family, friends and colleagues with this scholarship.

Eligible students must demonstrate academic excellence and a passion for biology. They must have declared a major in one of the Biological Sciences and have completed at least 12 units of the biology majors sequence of courses, preferably (but not limited to) the following courses: Biology 101, 102, 103, and 104 and Chemistry 155, 156. They may be either continuing their studies at SBCC (with a clear intent of pursuing an advanced degree) or transferring to a 4-year institution as a biology major.

Joe W. Dobbs, O.D., Scholarship Fund

Joe W. Dobbs, O.D., a dedicated supporter and Trustee of Santa Barbara City College, established this fund to support and encourage motivated students in Biological Sciences. These scholarships are available to students majoring in any area of Biological Sciences.

Established in 2004, Joe W. Dobbs Scholarships are awarded as book grants, scholarships and internships to students carrying twelve (12) or more units each semester, with a minimum overall G.P.A. of 2.5. Awards of the scholarships, grants or internships are based on academic achievement, with preference given to highly motivated, enthusiastic scholars showing the greatest potential for success in their chosen area of study. Awards are made at the beginning of Fall and Spring semesters, in amounts of \$100 (min.) books, \$1,000 (min.) grants and \$2,500 (min.) internships.

The deadlines for faculty nominations and student applications are August 15 (Fall awards) and December 15 (Spring awards).

Microbiology Achievement Award

The Microbiology Achievement Award is an endowed gift administered jointly by the Biological Sciences Department and the Foundation for Santa Barbara City College. The Award is meant as a special recognition to the student who demonstrated superior academic achievement in the field of microbiology, as well as in true academic tradition, exhibited outstanding class leadership and provided strong support to classmates.

Special Programs & Courses

291 — Seminars in the Biological Sciences

The 291 series in Biological Sciences is designed to provide students the opportunity to investigate areas outside the regular course offerings. The topics are selected on the basis of faculty and student interest. Students are urged to suggest topics to the department.

295/298/299 — Internship & Independent Studies

This series offers opportunities to students with particular skills or interests to receive credit for internship (295), independent reading (298) or research (299). You may enroll in Internship and Independent Studies at any time during the semester. You must secure a faculty sponsor and file an Independent Studies proposal with the Biological Sciences Office and the Office of Admissions.

Student Employment Opportunities

Each semester the Biological Sciences Department hires students as laboratory and museum assistants, collectors, tutors and readers. Students may apply for one of these positions at the Biological Sciences Offices (EBS-212/213). The greatest number of positions is available at the beginning of the school year. Students are encouraged to file an application during the prior spring semester or during the summer to have the best chance for employment beginning in the fall.

Student laboratory and museum assistants gain experience in laboratory and museum techniques under the supervision of Biological Sciences faculty and laboratory technicians. Museum assistants and collectors collect, accession and preserve botanical and animal specimens for use in classes and work on a variety of departmental projects.

Students who have performed well in a course and who demonstrate interest and ability in teaching are selected by the faculty as readers or to tutor students currently enrolled in the course. The purpose of this program is twofold: current students in the course receive excellent peer tutoring; and tutors learn the techniques of teaching. Tutors also find that to teach is to learn.

General Education Requirements

Area A. Natural Sciences

Twenty-three courses from the Biological Sciences Department satisfy the Natural Sciences General Education requirement.

For students with no prior biology courses, Concepts in Biology (BIOL 100) and Concepts in Botany (BOT 100) are excellent choices.

The following courses are recommended for students with high school biology or chemistry, or with a strong interest in biology. Each course satisfies the Natural Sciences requirement and allows students to study in their area of interest.

Plant Biology (BIOL 101)

Animal Biology (BIOL 102)

Natural Science, Honors (BIOL 110H)

Evolution & Adaptation and Biology Laboratory
(BIOL 112 + BIOL 141)

Natural History (BIOL 120)

Ecology & Laboratory (BIOL 122 + 123)

Biological Oceanography (BIOL 124)

Marine Biology (BIOL 125)

Freshwater Biology (BIOL 126)

Principles of Biology & Biology Laboratory (BIOL 140 + 141)

The Human Body (BMS 100)

Human Anatomy (BMS 107)

Human Physiology (BMS 108)

Human Anatomy & Physiology (BMS 109)

Plant Diversity (BOT 121)

Humans & the Biological Environment & Environmental Field
Studies (ENVS 110 + 111)

Animal Diversity & Laboratory (ZOO 122 + 123)

Area D2. Communication & Analytical Thinking

Cell Biology (BIOL 103) satisfies the General Education requirement for one *Language & Rationality* course in area D2, *Communication & Analytical Thinking*.

Course Descriptions

Anthropology

ANTH 101 — Physical Anthropology

(3) F, S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or 110H.

Biological aspects of human characteristics and behavior; the relationship of humans to other animals; the origins and evolutionary adaptations of human populations and the biological basis for the diversity of human groups. (CAN ANTH 2)

Biology

BIOL 100 — Concepts of Biology

(4) F, S, Summer — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Basic concepts of biology. Designed for non-biological sciences majors with no prior general biology course. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: no credit for BIOL 100 if taken after BIOL 101, 102 or 103)

BIOL 101 — Plant Biology

(5) F, S — CSU, UC

Prerequisites: MATH 107 or MATH 111

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Principles of biology, with emphasis on major plant groups. Anatomy, physiology, evolution and diversity of the Monera, Protocista, Fungi and Plantae. Required for the Biological Sciences major. Satisfies SBCC General Education requirement in Natural Sciences.

BIOL 102 — Animal Biology

(5) F, S — CSU, UC

Prerequisites: MATH 107 or MATH 111

Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BIOL 101

Principles of animal taxonomy, evolution, population and community ecology; protist and animal diversity and adaptations; emphasis on vertebrate anatomy and physiology. Required for the Biological Sciences major. Satisfies SBCC General Education requirement in Natural Sciences.

BIOL 103 — Cell Biology**(5.5) F, S — CSU, UC****Prerequisites: MATH 107 or MATH 111 and CHEM 104 or CHEM 155 and ENG110 or ENG 110H*

Cell structure and function: molecular architecture, reproduction and growth; elementary mechanisms of genetics; intercellular communication and behavior; cell and organ system physiology; life's origin. Study of the scientific literature with instruction in critical thinking, composition and logical analyses of ideas and experimental results. Required for the Biological Sciences and Biotechnology majors. Satisfies SBCC General Education requirement in Communication & Analytical Thinking. (*UC Transfer Limit: BIOL 103 maximum credit, 5 units)

BIOL 104 — Molecular Biology**(4) S — CSU, UC****Prerequisites: MATH 107 or MATH 111**Skills Advisories: Eligibility for ENG 110 or ENG 110H*
Course Advisories: CHEM 155 and CHEM 156

Molecular cell biology and genetics of prokaryotes and eukaryotes; emphasis on transmission and molecular biology of genes. Required for the Biological Sciences and Biotechnology majors. (*UC Transfer Limit: BIOL 104 and 105 combined: maximum credit, 5 units)

BIOL 105 — Molecular Biology Laboratory**(2) F and/or S — CSU, UC****Prerequisites: MATH 107 or MATH 111**Co-requisites: BIOL 104**Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Laboratory in molecular cell biology and genetics of prokaryotes and eukaryotes; emphasis on transmission and molecular biology of genes. Strongly recommended for the Biological Sciences major; required for Biotechnology majors. (*UC Transfer Limit: BIOL 104 and 105 combined: maximum credit, 5 units)

BIOL 106 — Biology of Research Organisms
(5) S — CSU*Prerequisites: MATH 107 or MATH 111**Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Biology, life histories and diversity of research organisms and tissues. Culture and maintenance of bacteria, fungi, protists, and plant and animal tissues. Required for the Biotechnology major.

BIOL 110 — Natural Science**(3) S — CSU, UC****Skills Advisories: Eligibility for ENG 110 or ENG 110H.*

Introduction to the physical and chemical principles important to an understanding of biological systems. Forces, matter and light; molecular structure and biochemical reactions; origin of life; bioenergetics; nerve and muscle; biological architecture; modes of locomotion; hearing and vision. In combination with BIOL 111, BIOL 110 satisfies General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 110 and 110H combined: maximum credit, one course)

BIOL 110H — Natural Science, Honors**(4) S — CSU, UC****Skills Advisories: Eligibility for ENG 110 or ENG 110H**Limitation on Enrollment: Acceptance into the Honors Program. See "Honors Program" section of this Catalog.*

Introduction to the physical and chemical principles important to an understanding of biological architecture and function. Laboratory and field investigations of forces, light and biomaterial; optimal form; bioenergetics; functional design. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 110 and 110H combined: maximum credit, one course)

BIOL 111 — Natural Science Laboratory**(1) F and/or S — CSU, UC***Co-requisites: BIOL 110**Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Laboratory and field investigations of forces, light and biomaterials; optimal form; bioenergetics; functional design. In combination with BIOL 110, 111 satisfies General Education requirement in Natural Sciences.

BIOL 112 — Evolution and Adaptation**(3) F, S — CSU, UC***Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Principles of biological evolution, diversity of life on Earth, and a survey of living and extinct organisms. Investigates theories of life's origin, modes of speciation and adaptations of dominant life forms through the ages. In combination with BIOL 141, BIOL 112 satisfies General Education requirement in Natural Sciences.

BIOL 116 — Biological Illustration

(4) F, S — CSU

Skills Advisory: Eligibility for ENG 110 or ENG 110H
Course Advisories: ART 120

Traditional and contemporary techniques of scientific illustration of biological subjects for technical and medical print and electronic publications. May be taken four times for credit.

BIOL 118 — Nature Photography

(3) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Field and laboratory photography of biological subjects. Camera, light and film, and the special methods of wildlife photography, photomacrography, photomicrography and converting images to digital formats. May be taken four times for credit.

BIOL 120 — Natural History

(4) F — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Survey of the natural environment through studies of Earth's ecosystems: emphasis on the plant and animal inhabitants and the influences of cosmic, geological and meteorological phenomena. Satisfies SBCC General Education requirement in Natural Sciences.

BIOL 122 — Ecology

(3) F, S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Organisms and populations as integrated elements of communities and ecosystems. Population structure, growth and evolution; relationships between species: competition, predation, coevolution; community structure and development; biodiversity; biogeography. Satisfies SBCC General Education Requirement in Natural Sciences when combined with Biology 123.

BIOL 123 — Ecology Laboratory

(1) F, S, Summer — CSU, UC

Co-requisites: BIOL 122

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Laboratory and field investigations of ecological principles. Satisfies SBCC General Education Requirement in Natural Sciences when combined with Biology 122.

BIOL 124 — Biological Oceanography

(4) F — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Relationships between marine plants and animals and physical characteristics of Earth's oceans. Emphasis on forms of marine organisms found in the open sea, their characteristics and ecological relationships. Biological sampling techniques and physical measurements studied in laboratory and at sea. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 124 combined with EARTH 151: maximum credit, one course)

BIOL 125 — Marine Biology

(4) S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Marine plants and animals, with emphasis on local organisms and their ecological adaptations. Laboratory covers particular habitats in the littoral zone during low tides. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 125 and 126 combined: maximum credit, one course)

BIOL 126 — Freshwater Biology

(4) F and/or S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Diversity of plants and animals associated with marshes, ponds, lakes and streams; ecological relationships and adaptations to life in water. Field studies emphasized. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 125 and 126 combined: maximum credit, one course)

BIOL 130 — Methods in Field Biology

(3) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Nature photography, photomicroscopy, illustration and data collection to record events in nature. Students participate in research projects, maintain a field notebook/journal and produce a research report displaying the results of techniques learned over the semester. May be taken four times for credit.

BIOL 133 — Ecology of Morro Bay Area
(1) S — CSU

Prerequisites: BIOL 102 or BIOL 125 or ZOO 122
Skills Advisories: Eligibility for ENG 110 or ENG 110H

Field course of study introducing the ecology of the relatively undisturbed wetland habitats of the Morro Bay region of the central California coast (mudflats, salt marsh, rocky outer coast). May be taken four times for credit.

BIOL 140 — Principles of Biology
(3) F, S, Summer — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Basic principles of biology. Designed for Non-Biological Sciences majors. Not open to students who have completed Biology 100. (*UC Transfer Limit: no credit for BIOL 140 if taken after 100, 101, 102 or 103)

BIOL 141 — Biology Laboratory
(2) F, S — CSU, UC*

Co-requisites: BIOL 140 or BIOL 112
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: High school biology

Laboratory investigation of biological principles and techniques of investigation. Satisfies SBCC General Education requirement in Natural Sciences when combined with Biology 140 or Biology 112. (*UC Transfer Limit: no credit for BIOL 141 unless taken after or concurrently with BIOL 112 or 140)

BIOL 142 — Marine Science
(3) F, S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to oceanography and marine biology: ocean properties, marine ecology of the tropics, poles, temperate and deep-sea regions, and marine environmental concerns.

BIOL 144 — Biogeography
(3) F, S and I or Summer — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Survey of the ecology and distribution of life on Earth.

BIOL 150 — Biodiversity
(3) F, S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: High school biology

Diversity, adaptations and evolutionary history of life on Earth; principles of ecology and evolution. Examination of theories of systematics and nomenclature.

BIOL 151A-Z — Biodiversity
(0.5-2) F and I or S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: High school biology

Diversity, adaptations and evolutionary history of life on Earth; principles of ecology and evolution. Examination of theories of systematics and nomenclature.

Courses currently available:

151L — Biodiversity: Insects and Allied Forms2

151S — Biodiversity: Birds2

BIOL 172 — Symbiosis
(3) F and/or S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Origins and nature of biological partnerships. Symbiotic relations from microbial landscapes to global ecology. Emphasis on ecological, behavioral and chemical exchanges between organisms and ecosystems.

BIOL 291 — Seminars in Biology
(2) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Topic or group of interrelated topics presented in seminar format by students enrolled in the course. Course content varies. Information on course content may be obtained from the Biological Sciences Department Office or SBCC *Schedule of Classes*. May be taken four times for credit. (*UC Transfer Limit: BIOL 291 computed as Independent Studies; please see counselor)

Independent Studies in Biology

For prerequisites and eligibility information, see "Independent Study" in the *Catalog Index*. In order to enroll in a BIOL 295 or 299 course, a student must have completed 12 units at SBCC with a G.P.A. of 2.5 and a minimum of 6 units with a G.P.A. of 3.0 in the Biological Sciences Department.

**BIOL 295 — Internship in Biology
(1-4) F, S — CSU**

Limitation on Enrollment: Student must have completed 12 units at SBCC with a G.P.A. of 2.5 and a minimum of 6 units with a G.P.A. of 3.0 in the Biological Sciences Department.
Skills Advisories: Eligibility for ENG 110 or ENG 110H

Structured, on-the-job experience in a field directly related to the student's area of interest in the biological sciences.

**BIOL 298 — Independent Reading in Biology
(1-4) F, S — CSU**

Limitation on Enrollment: Student must have completed 12 units at SBCC with a G.P.A. of 2.5 and a minimum of 6 units with a G.P.A. of 3.0 in the Biological Sciences Department.
Skills Advisories: Eligibility for ENG 110 or ENG 110H

Independent literature search and/or reading of material on a topic in biology. A final report, including an annotated bibliography, is required. May be taken four times for credit. (*UC Transfer Limit: BIOL 298 computed as Independent Studies; please see counselor)

**BIOL 299 — Independent Research in Biology
(1-4) F, S — CSU**

Limitation on Enrollment: Student must have completed 12 units at SBCC with a G.P.A. of 2.5 and a minimum of 6 units with a G.P.A. of 3.0 in the Biological Sciences Department.
Skills Advisories: Eligibility for ENG 110 or ENG 110H

Independent, systematic research investigation of a problem in biology. A final report on research conducted is required. May be taken four times for credit. (*UC Transfer Limit: BIOL 299 computed as Independent Studies; please see counselor)

Bio-Medical Sciences

**BMS 100 — The Human Body
(4) F, S — CSU, UC***

Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: High school science course

Structure and function of the human body. Non-technical introduction to anatomy, physiology, exercise, fitness and nutrition. Laboratory experiments in human physiology; study of human anatomical materials. Satisfies SBCC General Education requirement in Natural Sciences. Satisfies Anatomy and Physiology requirements for SBCC LVN program. Does not satisfy requirements for ADN majors. (*UC Transfer Limit: no credit for BMS 100 if taken after BMS 107 or 108 or 109; BMS 100, 107, 108, 109, and 146 combined: maximum credit, two courses)

**BMS 107 — Human Anatomy
(4) F, S, Summer — CSU, UC***

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Structure of the human body. Laboratory includes study of a human anatomical specimen and comparative anatomy. Transferable to all four-year institutions, including nursing schools. Satisfies SBCC General Education requirement in Natural Sciences. (CAN BIOL 10 or CAN BIOL SEQ B [with BMS 108]) (*UC Transfer Limit: BMS 100, 107, 108, 109 and 146 combined: maximum credit, two courses)

**BMS 108 — Human Physiology
(4) F, S — CSU, UC***

Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BMS 107

Functions of the human body. Laboratory emphasizes recording physiological data from each student. Transferable to all four-year institutions, including nursing schools. Satisfies SBCC General Education requirement in Natural Sciences. (CAN BIOL 12 or CAN BIOL SEQ B [with BMS 107]) (*UC Transfer Limit: BMS 100, 107, 108, 109, and 146 combined: maximum credit, two courses)

BMS 109 — Human Anatomy and Physiology
(5) F — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Structure and function of the human body. Laboratory study of anatomy of the human body by cadaver, comparative anatomy, charts and models. Satisfies SBCC General Education requirement in Natural Sciences. Satisfies Anatomy and Physiology requirement for SBCC ADN Program. (*UC Transfer Limit: BMS 100, 107, 108, 109, and 146 combined: maximum credit, two courses)

BMS 117 — Introductory Microbiology
(3) S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: BIOL 100 and CHEM 100 or CHEM 104

Principles of microbiology and an introduction to micro-organisms. Not open to students with credit for BMS 127. (Designed for allied health majors not interested in a baccalaureate degree.)

BMS 118 — Human Microanatomy
(4) S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Functional histology of the human body. Cell structure and function; architecture, control and integration of cells in tissues and organs. Survey of tissues of all major organs.

BMS 119 — Human Dissection
(1-3) F, S, Summer — CSU

Prerequisites: BMS 107 or BIOL 102

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Directed dissection of human cadaver. May be taken for one to three units of credit per semester. Each unit of credit requires 48 hours laboratory work per semester. Graded Pass/No Pass only. May be repeated to a maximum of nine units of credit. (*UC Transfer Limit: computed as Independent Studies; please see counselor)

BMS 127 — Medical Microbiology
(5) F, S — CSU, UC

Prerequisites: CHEM 101 or CHEM 104 or CHEM 155

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Survey of general microbiology, with emphasis on characteristics of organisms associated with human disease—specifically, viruses, bacteria, rickettsia, yeasts, protozoa, helminthes and arthropods. Analysis of the interaction of host-parasite relationship. (CAN BIOL 14)

BMS 128 — Human Nutrition
(3) F, S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Nutritional needs of the human body. Studies individual, local, national and world nutritional efforts. (CAN FCS 2)

BMS 128L — Human Nutrition Laboratory
(1) F, S — CSU, UC

Co-requisites: BMS 128

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Laboratory investigations of human nutrition; nutritional analysis of food; and guidelines for prevention of chronic diseases through diet.

BMS 136 — Biology of Human Sexuality
(3) F, S and/or Summer — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Fundamental principles and current research focused on the anatomy and physiology of reproductive systems, hormonal control of reproductive cycles, diversity of sexual responses, evolutionary origins of human sexuality, basic genetics and heredity, early human development, pregnancy, parturition, causes and treatments of infertility, sexually transmitted infections, contraception, age-related changes in sexual function and behavior, sexual dysfunction and comparative sexual behaviors. (*UC Transfer Limit: BMS 136, HE 111 and PSY 125 combined: maximum credit, one course)

BMS 146 — Human Form and Function
(3) F, S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: College-level biology and chemistry

Descriptive introduction to the structure and function of the human body. (*UC Transfer Limit: BMS 100, 107, 108, 109 and 146 combined: maximum credit two courses)

Botany

BOT 100 — Concepts of Botany

(4) F, S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Plant structure and function; the role of plants in the biosphere and society. Laboratory includes field studies. Designed for non-Biological Sciences majors with no prior general botany course. Satisfies SBCC General Education requirement in Natural Sciences. (CAN BIOL 6) (*UC Transfer Limit: No credit for BOT 100 if taken after BOT 121; BOT 100, 121, and 122 combined: maximum credit, two courses)

BOT 121— Plant Diversity

(4) F and/or S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BIOL 100

Plant diversity, adaptations and evolutionary history; principles of ecology and evolution. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BOT 100, 121, and 122 combined: maximum credit, two courses)

BOT 122 — Flowering Plant Identification

(3) S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Botanical classification, methods of identification and recognition of important California plant species and families. (*UC Transfer Limit: BOT 100, 121 and 122 combined: maximum credit, two courses)

BOT 123 — Field Botany

(3) F, S — CSU, UC*

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Flora, vegetation and major ecological features of natural ecosystems; field lectures, laboratories and camping. Five one-day field trips; a fee is charged. May be taken four times for credit. (*UC Transfer Limit: BOT 123 may be taken only once for transfer credit)

BOT 129 — Survey of Earth's Vegetation

(3) F — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Diversity and structure of Earth's vegetation types and associated environmental factors responsible for these natural associations. Consideration is given to the preservation, destruction and reconstruction of native vegetation.

BOT 131 — Biology of Mushrooms

(1) S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Six-week short course. Two hours lecture weekly. Twelve (12) hours field to be arranged. May be taken four times for credit.

BOT 132 — Marine Botany

(1) S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Six-week short course beginning mid-semester. Two hours lecture weekly. Twelve (12) hours field to be arranged. May be taken four times for credit.

Environmental Studies

ENVS 110 — Humans and the Biological Environment

(3) F, S — CSU, UC

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Growth and variations in populations of organisms and their interactions with the physical environment. Characteristics of living natural resources and changes caused by expanding human populations and technological developments. Satisfies SBCC General Education requirement in Natural Sciences when combined with ENVS 111. (Required for the Environmental Studies major.)

ENVS 111 — Environmental Field Studies

(1) S — CSU, UC*

Co-requisites: ENVS 110

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Field studies designed to demonstrate general ecological/environmental principles through exposure to and analysis of many different communities and sites of environmental concern. Satisfies SBCC General Education requirement in Natural Sciences when combined with ENVS 110. (*UC Transfer Limit: no credit for ENVS 111 unless taken after or concurrently with 110)

Zoology**ZOOL 110 — Animal Physiology****(3) F, S — CSU, UC***Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Animal function – “how animals work.” Investigates animals’ physiological systems, perception of and responses to external stimuli, integration of activities, maintenance of the internal environment, locomotion and reproduction.

ZOOL 122 — Animal Diversity**(3) F, S — CSU, UC***Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Introduction to zoology. Animal diversity, anatomy and physiology, adaptations and evolution. Principles of ecology. Satisfies SBCC General Education requirement in Natural Sciences when combined with ZOOL 123. (CAN BIOL 4 [with ZOOL 123])

ZOOL 123 — Animal Diversity Laboratory**(1) F, S — CSU, UC***Co-requisites: ZOOL 122**Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Laboratory and field investigations of animals. Animal diversity, anatomy and physiology, principles of ecology and evolution. Satisfies SBCC General Education requirement in Natural Sciences when combined with ZOOL 122. (CAN BIOL 4 [with ZOOL 122])

ZOOL 124 — Insect Biology**(4) F and/or S — CSU, UC***Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Introduction to anatomy, physiology, ecology, behavior and diversity of insects and other terrestrial arthropods. Laboratory and field excursions emphasize identification, close-up photography and collection.

ZOOL 133 — The Natural History of Insects**(1.5) S — CSU***Skills Advisories: Eligibility for ENG 110 or ENG 110H*
Six-week short course

Introduction to the natural history and identification of insects. Laboratory and field excursions emphasize identification, close-up photography and collection. May be taken four times for credit.

ZOOL 137 — Ornithology**(3) F, S — CSU, UC***Skills Advisories: Eligibility for ENG 110 or ENG 110H*
3.3 hours lecture weekly

Systematics, distribution, physiology, behavior, and ecology of birds. Emphasis on diversity, functional morphology and evolutionary history.

ZOOL 138 — Biology of Birds**(1.5) F, S — CSU***Skills Advisories: Eligibility for ENG 110 or ENG 110H*
Eight-week short course

Anatomy, physiology, evolution and behavior of birds. Field trips are timed to coincide with migratory periods and emphasize identification and classification. May be taken four times for credit.

ZOOL 140 — Animal Behavior**(3) F, S — CSU, UC***Skills Advisories: Eligibility for ENG 110 or ENG 110H*

Introduction to animal behavior; methods and results of studies of invertebrate and vertebrate behavior; foraging strategies, social competition, sexual selection, mating systems, cooperation and social organization.
