

Health Information Technology and Cancer Information Management

Opportunities in the health information field have expanded with changes in health care delivery, utilization and financing and with developments in information technology. The Health Information Technology and Cancer Information Management Department offers five exciting options to prepare for a health information career: (1) the Associate in Science in Health Information Technology; (2) the Associate in Science in Cancer Information Management; (3) the Certificate of Achievement in Cancer Information Management; (4) the Certificate of Achievement in Medical Coding Specialist; and (5) the Certificate of Achievement in Medical Reimbursement Specialist. Programs 1 to 4 (above) are offered completely online; students enrolled in #5 (above), the Medical Reimbursement Specialist program, are required to take accounting in a face-to-face classroom or online elsewhere.

Students must have access to the Internet to enroll in these programs and must complete online orientation activities as the first class session of each course. Students must meet online technical requirements. Core elements of each online lecture course include successful completion of the course objectives using the Internet, textbooks, study materials and computer applications. Examinations are online. Professional directed practice, under the guidance of a clinical preceptor, is provided at facilities as close as possible to each student's residence.

Health Information Technology

The Health Information Technology (HIT) Program prepares students for a career that places them right where the expanding arena of healthcare meets the cutting edge of technology. HIT professionals are the experts on patient data that doctors, nurses and other providers rely on to perform their jobs and which consumers need to manage their own healthcare. By maintaining, collecting, analyzing and securing health information, their work makes an important contribution to the delivery of quality care.

Graduates of the program are granted the Associate in Science Degree in Health Information Technology. The program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM), in cooperation with the American Health Information Management Association. Graduates are eligible to take the national certifying exam to become a Registered Health Information Technician (RHIT).

Cancer Information Management

The Cancer Information Management (CIM) Program prepares students for positions with hospital-based and population-based cancer registries. Responsibilities typically include identification of reportable cancer cases; abstraction of pertinent cancer data from patient records and pathology, radiology and surgical reports; coding and staging primary site, histology and extent of disease; monitoring completeness, timeliness and quality of cancer data; performing cancer patient follow-up activities to identify second primaries, recurrence and spread of disease; reporting cancer data to health care officials, hospital administrators, physicians and regulatory organizations for use in cancer prevention and control; assisting the medical staff and epidemiologists in special studies and research; and supervising staff.

Graduates of this program who earn either the Certificate of Achievement or the Associate in Science Degree in Cancer Information Management are eligible to take the national certifying exam to become a Certified Tumor Registrar (CTR). The program has been approved by the National Cancer Registrars Association.

Medical Coding Specialist

This completely online certificate program prepares students for a position as a medical coder in an acute care hospital, clinic or physician's office, long-term care facility and other health care settings. Coders ensure that valid codes are applied to medical diagnoses and procedures to facilitate reimbursement, analysis of patient outcomes, and research.

The Medical Coding Specialist Certificate of Achievement prepares students to sit for the national certification examination to become a Certified Coding Associate (CCA). The program is approved by the American Health Information Management Association.

Medical Reimbursement Specialist

This certificate program prepares students for positions in the billing departments of health care facilities. Medical Reimbursement Specialists are valuable members of medical financial management teams, ensuring that optimum reimbursement is obtained through coding, billing and collecting for all services rendered. Reimbursement professionals can also serve as resources to patients and families in understanding reimbursement coverage offered by insurance and/or managed care organizations. All classes are currently offered online except for Introduction to Accounting.

Department Offices

Health Information Technology & Cancer Information Management Programs (ext. 2851)
Health Technologies Counselors (ext. 2285)

Faculty/Staff

Gwyer Schuyler, *HIT/CIM Department Chair*
(schuyler@sbcc.edu)
Janet Robertson, *HIT Program Coordinator*
(robertso@sbcc.edu)
Lillian Antonelli, *CIM Coordinator*

Degrees & Certificates Awarded

Associate in Science

Health Information Technology
Cancer Information Management

Certificate of Achievement

Medical Coding Specialist
Medical Reimbursement Specialist
Cancer Information Management

A.S. Degree: Health Information Technology

Department Requirements (46 units)

The following reflects the recommended sequence of courses.

Department requirements offered online by SBCC:

COMP 101 — Microsoft Office	4
HIT 135 — Basic Medical Terminology.....	3
BMS 146 — Human Form and Function	3
HIT 101 — Intro. to Health Information Management.....	3
HIT 102 — Legal Aspects of Health Care.....	3
HIT 204 — Basic Pathophysiology	3
HIT 201 — Pharmacology for Allied Health	2
HIT 200 — ICD-9-CM Coding.....	3
HIT 210 — CPT Procedural Coding	3
HIT 255+ — Medical Insurance and Reimbursement	4
HIT 220 — Health Information Management Statistics	2
HIT 240 — Health Care Quality Management Assessment	3
HIT 230 — Alternative Delivery Systems.....	2
HIT 265 — HIM Computer Applications.....	2
MGMT 101 — Introduction to Management	3
HIT 275# — HIM Practicum.....	3

+ This requirement may be met by HIT 150 plus HIT 250.

All HIT classes must be completed before HIT 275 is begun

College Requirements

For complete information see “Graduation Requirements” in the *Catalog Index*.

A.S. Degree: Cancer Information Management

Department Requirements (47 units)

The following reflects the recommended sequence of courses.

HIT 135 — Basic Medical Terminology.....3
 BMS 146 — Human Form and Function3
 COMP 101 — Microsoft Office4
 CIM 100 — Registry Organization and Operations3
 HIT 101 — Introduction to Health Information Management.....3
 HIT 204 — Basic Pathophysiology3
 CIM 125 — Cancer Disease Management.....4
 CIM 201 — Abstracting Principles and Practice I3
 CIM 150 — Oncology Coding and Staging Systems.....4
 CIM 202 — Abstracting Principles and Practice II3
 CIM 225 — Cancer Patient Follow-up2
 CIM 250 — Cancer Statistics and Epidemiology.....3
 HIT 240 — Health Care Quality Management.....3
 MGMT 101 — Introduction to Management3
 CIM 275* — CIM Practicum3

** All CIM classes must be completed before CIM 275 is begun.*

College Requirements

For complete information see “Graduation Requirements” in the *Catalog* Index.

Certificate of Achievement: Cancer Information Management

Department Requirements (47 units)

The following reflects the recommended sequence of courses.

HIT 135 — Basic Medical Terminology.....3
 BMS 146 — Human Form and Function3
 COMP 101 — Microsoft Office4

CIM 100 — Registry Organization and Operations3
 HIT 101 — Introduction to Health Information Management.....3
 HIT 204 — Basic Pathophysiology3
 CIM 125 — Cancer Disease Management.....4
 CIM 201 — Abstracting Principles and Practice I3
 CIM 150 — Oncology Coding and Staging Systems.....4
 CIM 202 — Abstracting Principles and Practice II3
 CIM 225 — Cancer Patient Follow-up2
 CIM 250 — Cancer Statistics and Epidemiology.....3
 HIT 240 — Health Care Quality Mgmt Assessment3
 MGMT 101 — Introduction to Management3
 CIM 275* — CIM Practicum3

** All CIM classes must be completed before CIM 275 is begun.*

Certificate Requirements: Medical Coding Specialist Certificate

Department Requirements (33 units)

The following reflects the recommended sequence of courses.

COMP 101 — Microsoft Office4
 HIT 135* — Basic Medical Terminology3
 BMS 146* — Human Form and Function3
 HIT 101 — Intro. to Health Information Management.....3
 HIT 204 — Basic Pathophysiology3
 HIT 200* — ICD-9-CM Coding3
 HIT 201 — Pharmacology for Allied Health2
 HIT 210 — CPT Procedural Coding3
 HIT 255+ — Medical Insurance and Reimbursement4
 HIT 205 — Advanced Coding Applications.....4
 HIT 280# — Medical Coding Practicum1

**HIT 135 and BMS 146 are prerequisites to HIT 200.
 +HIT 150 plus HIT 250 will also satisfy this requirement.
 #All other classes must be completed before HIT 280 is begun. A background check may be required by the host facility.*

**Certificate Requirements:
Medical Reimbursement
Specialist Certificate**

Department Requirements (30 units)

The following reflects the recommended sequence of courses.

HIT 135* — Basic Medical Terminology	3
BMS 146* — Human Form and Function.....	3
COMP 101 — Microsoft Office	4
ACCT 110# — Introduction to Accounting	4
HIT 101 — Intro. to Health Information Management.....	3
HIT 204 — Basic Pathophysiology	3
HIT 200* — ICD-9-CM Coding	3
HIT 210 — CPT Procedural Coding	3
HIT 255+ — Medical Insurance and Reimbursement	4

**HIT 135 and BMS 146 or BMS 107 and BMS 108 are prerequisites to HIT 200.*

+HIT 150 and HIT250 will also satisfy this requirement.

#ACCT 110 is not offered on-line at SBCC.

Planning a Program of Study

Continually updated program information is available at www.sbcc.edu/HIT/website.

Course Descriptions

Health Information Technology

HIT 101 — Introduction to Health Information Management

(3) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to the fundamental theories and practices of health information management, including health services organization and delivery; health data and record structure, content and standards; healthcare information technology functions and responsibilities, information systems, technologies and requirements; and health information privacy and security.

HIT 102 — Legal Aspects of Health Care

(3) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to legal issues pertaining to healthcare, health information and the health record as a legal document. Patient privacy and confidentiality, patient rights, release of information, informed consents, advance directives, compliance, fraud and abuse, HIPAA and E-Health.

HIT 135 — Basic Medical Terminology

(3) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to medical terminology for body structure, body systems and diagnostic work. Prefixes, suffixes, word roots and combined word forms. Includes instruction in spelling, definition and pronunciation.

HIT 200 — ICD-9-CM Coding

(3) F, S — CSU

Prerequisites: BMS 146 and HIT 135

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: HIT 101 and HIT 204

Beginning overview of nomenclature and classification systems, with focus on coding inpatient clinical information from medical records. Introduction to *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD9-CM). Instruction in coding diagnoses and procedures, using ICD9-CM coding, sequencing and coding conventions. Review of complications and co-morbidities. Coding software applications introduced.

HIT 201 — Pharmacology for Allied Health

(2) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to pharmacology, basic pharmacological terminology and concepts, drug categories and their uses, mechanisms of drug action, dosage forms, routes of administration, and common generic and tradename medications.

HIT 204 — Basic Pathophysiology

(3) F, S — CSU

Prerequisites: BMS 146

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to the fundamentals of pathophysiology, with focus on essential concepts of physiologic changes and altered functions in the human body resulting from disease processes. Principles from anatomy, physiology and chemistry provide the foundation for the study of basic disease process concepts, body systems, etiology and pathogenesis of various disorders. Diagnostic procedures, preventative measures and current therapeutic regimens are explored.

HIT 205 — Advanced Coding Applications

(4) F, S — CSU

Prerequisites: HIT 200

Co-requisites: HIT 210

Course Advisories: HIT 255

Advanced medical coding for addressing more complex issues related to the ICD-9-CM and HCPCS/CPT coding. Lectures and assignments focus on using case studies, mock records and applying learning at a higher coding skill level. Computerized encoders and groupers emphasized.

HIT 210 — CPT Procedural Coding

(3) F, S — CSU

Prerequisites: BMS 146 and HIT 135

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: HIT 101

Beginning HCPCS/CPT coding class for ambulatory services coding related to facility and professional services, with overview of coding conventions, principles, regulatory guidance and coding software.

HIT 220 — Health Information Management Statistics

(2) — CSU

Skills Advisories: MATH 4 and Eligibility for ENG 110 or ENG 110H

Course Advisories: HIT 101

Introduction to healthcare statistics, including a review of mathematics, interpretation of healthcare statistical formulas, presentation of data, and application of medical research tools. Use of statistics in relation to long-range healthcare planning and development, application of automated systems, integration of reports and registration of vital statistics.

HIT 230 — Alternative Delivery Systems

(2) F, S — CSU

Prerequisites: HIT 101

Course Advisories: COMP 101 and HIT 240

Introduction to Health Information Management practice in alternative healthcare delivery systems, including ambulatory, long-term and managed care, mental health, rehabilitation medicine, and hospice and home health. Focuses on regulatory and accreditation requirements, funding and reimbursement, transition to the EHR, and health data privacy and security.

HIT 240 — Health Care Quality Management

(3) F, S — CSU

Prerequisites: COMP 101 and HIT 101

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: HIT 255

Applies continuous healthcare quality management and performance improvement principles to the hospital setting, focusing on historical, theoretical, and practical applications and methodologies. Includes data collection and analysis; regulatory, accreditation and patient safety compliance; credentialing and utilization; case and risk management.

HIT 255 — Medical Insurance and Reimbursement

(4) F, S — CSU

Co-requisites: HIT 200

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: HIT 101 and HIT 210

Introduction to the basics of medical insurance billing and current payment methodologies in the inpatient, hospital outpatient and physician office's settings. Focus is on compliance with regulatory requirements and common billing practices.

HIT 265 — HIM Computer Applications

(2) F, S — CSU

Prerequisites: COMP 101 and HIT 101

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Intermediate-level systems class focusing on computer applications in healthcare and health information management. Includes application of basic computer and communication concepts and technologies, systems development and analysis, work flow mapping, queries and reports for information retrieval, and migration to the electronic health record.

HIT 275 — HIT Practicum

(3) F, S — CSU

Prerequisites: HIT 200 and HIT 240 and HIT 255

Limitation on Enrollment: Students must have completed the HIT program classes or their equivalent prior to starting the practicum onsite at an affiliated healthcare organization. A physical examination and up-to-date immunizations are required at student's own expense. A background check may be required at student's own expense by the practicum site.

Supervised onsite experience performing CAHIM/AHIMA-required HIT competencies for an affiliated healthcare organization. Content includes confidentiality, privacy and security of health information; retention, retrieval, storage and release of health information; electronic health records and compliance with reimbursement, regulatory and accreditation requirements for health information. Students have status of learners, are not considered employees, and are not to replace employed staff. Clinical practice is conducted as a non-paid, laboratory experience.

HIT 280 — Medical Coding Practicum

(1) F, S — CSU

Prerequisites: HIT 205 and HIT 210 and HIT 255

Skills Advisories: Eligibility for ENG 100

Limitation on Enrollment: Students must be enrolled in the SBCC Medical Coding Certificate program to register for this course. A physical examination and up-to-date immunizations are required at student's own expense, and a background check may be required at student's own expense by the practicum site.

Practicum in application of clinical classification systems, coding, case mix analysis, and use of coded and abstracted data. Discussion focuses on directed practice activities. Supervised clinical experience focuses on coding patient care records. Students are assigned to an affiliated health-related agency for supervised clinical practice where they have the status of learners, not considered agency employees, and are not to replace employed staff. Clinical practice is conducted as a non-paid, laboratory experience.

HIT 284 — Certified Coding Associate Exam Preparation

(3) F

Prerequisites: HIT 205 and HIT 255

Limitation Enrollment: Must be in final semester at SBCC (or an equivalent career technical college) in the Medical Coding Program, or have completed HIT 280 or its equivalent, or be an experienced medical coder in an acute care hospital or physician office setting.

Review of principles of health information documentation, coding, reimbursement methodologies, compliance and data quality to prepare medical coding certificate and experienced medical coders for AHIMA coding certification examinations.

HIT 285 — Registered Health Information Technician Exam Preparation

(3) F, S

Course Advisories: HIT 275

In-depth review of health information principles and applications to prepare Health Information Technology graduates for the American Health Information Management Association's national RHIT examination. Focus is on reviewing materials covered in the HIT Program, as well as learning techniques in test-taking and studying for the examination. Students use links to mock test questions, discussion boards and other resources to prepare them for the national exam.

Course Descriptions

Cancer Information Management

CIM 100 — Registry Organization and Operations

(3) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to hospital-based and central cancer registries, legal issues, confidentiality, standard-setting organizations, types of cancer registries and other disease registries, and data users, computer applications, quality control, and registry operations, including case ascertainment and disease registry files.

CIM 125 — Cancer Disease Management

(4) F, S — CSU

Prerequisites: BMS 146 and HIT 135

Co-requisites: CIM 100

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Introduction to the pathophysiology of cancer, using principles from anatomy, physiology and chemistry to provide a foundation for the study of oncology disease process. Diagnostic and staging procedures to include laboratory, pathology, radiography and surgical procedures; treatment modalities include surgery, radiation therapy, chemotherapy, immunotherapy and others, emphasizing the major sites of cancer; clinical trials and research protocols.

CIM 150 — Oncology Coding and Staging Systems

(4) F, S — CSU

Prerequisites: CIM 125

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Course Advisories: CIM 100

Oncology coding and staging systems, including an overview of the International Classification of Diseases for Oncology nomenclature and classification system. Focus on coding clinical information from medical records. Coding diagnosis and procedures, sequencing and coding conventions. Staging and extent of disease concepts used by physicians and cancer surveillance organizations to determine treatment and survival. Collaborative staging system rules for coding extent of disease on cancer abstracts.

CIM 201 — Abstracting Principles and Practice I

(3) F, S — CSU

Prerequisites: HIT 135

Co-requisites: Prior or concurrent enrollment in CIM 125

Skills Advisories: Eligibility for ENG 110 or ENG 110H or ENG 110GB

Introduction to the principles of cancer registry abstracting. Identification and selection of appropriate clinical information from medical records to be captured on the cancer registry abstract in a manner consistent with cancer registry regulatory core data requirements.

CIM 202 — Abstracting Principles and Practice II

(3) F, S — CSU

Prerequisites: CIM 201

Co-requisites: Prior or concurrent enrollment in CIM 150

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Application of the principles of cancer registry abstracting for the 5 major sites of primary cancer (breast, colon, lung, prostate and bladder). Identification, and selection and recording on a cancer registry abstract of appropriate demographic and site-specific clinical information pertaining to the diagnosis and treatment of cancer from medical records for core data in a manner consistent with cancer registry regulatory core data requirements. Recording, coding and staging site-specific cancer information, using manual and computerized applications. Manual quality control edits of abstracted information to assure timeliness, completeness and accuracy of data.

CIM 225 — Cancer Patient Follow-up

(2) F, S — CSU

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Cancer patient methodology, confidentiality and ethical issues, identification of second primaries and survival data. Physician, patient, third party and other follow-up resources and activities introduced.

**CIM 250 — Cancer Statistics
and Epidemiology**

(3) F, S — CSU

Prerequisite: CIM 201 and 202

Skills Advisories: MATH 100 and Eligibility for ENG 110 or ENG 110H

Introduction to cancer statistics, descriptive and analytic epidemiology, cancer surveillance, annual report preparation, presentation of cancer data and special studies. Use of cancer statistical data for marketing and strategic planning.

CIM 275 — CIM Practicum

(3) F, S — CSU

Prerequisites: CIM 202 and CIM 225 and CIM 250

Co-requisites: Prior or concurrent enrollment in HIT 240

Skills Advisories: Eligibility for ENG 110 or ENG 110H

Limitation on Enrollment: This is the last class in SBCC's CIM Program. Students must have completed CIM Program classes or their equivalent prior to starting the practicum onsite at an affiliated healthcare organization or agency. A physical examination and up-to-date immunizations are required at student's own expense. A background check may be required by the practicum site at student's own expense.

Practicum in cancer registry operations for hands-on experience in all aspects of registry organization and operation. Supervised clinical experience in performing NCRA-required cancer information management competencies in an actual registry setting.
