

AP 7145 PERSONNEL FILES

References:

- Education Code Section 87031;
- Labor Code Section 1198.5;

Personnel records are private (Government Code Section 6254(c)), accurate, complete, and permanent employment records maintained by the Human Resources Department.

Every employee has the right to inspect their personnel records pursuant to the Labor Code. By appointment, the employee shall be permitted to examine their file within the Human Resources Department. The review shall take place during normal business hours and the employee shall be released from duty for this purpose without salary reduction.

The employee shall be permitted to request that any material in their file be reproduced. An employee shall receive a copy of all evaluations put in their file. Information of a derogatory nature shall not be entered into an employee's personnel file unless and until the employee is given notice and an opportunity to review and comment on that information. The employee shall have the right to enter, and have their own comments attached to any derogatory statement.

Nothing in this procedure shall entitle an employee to review ratings, reports, or records that (a) were obtained prior to the employment of the person involved, (b) were prepared by identifiable examination committee members, or (c) were obtained in connection with a promotional examination or interview.

The Superintendent/President shall implement a system by which staff and faculty can declare an affirmed name, gender, or both name and gender identification to be used in their records where legal names are not required by law. Upon the request of a staff or faculty member, the District shall update any records for the individual to include the affirmed name, gender, or both name and gender identification. The records that shall be updated include but are not limited to District-issued email addresses, employee identification cards, class rosters, unofficial and official transcripts, diplomas, certificates of completion of courses, or similar records.
